

Insect Life Cycle (directions)

Directions: A butterfly's life cycle provides a great example of metamorphosis!

You can construct your own chart of an insect life cycle! Simply print the worksheet and follow these directions:

Use a pair of scissors to cut out the four pictures that show the different stages of a butterfly's life cycle.

Use some household glue or clear tape to attach the pictures in the correct order on the worksheet.

Then cut out and attach the labels in the correct order.

Did you get the life cycle order right?

Answer key
The correct order of the insect life cycle is: 1) Eggs 2) Caterpillar 3) Chrysalis 4) Butterfly
