

# Plant anatomy (worksheet)

**Directions:** Use a pair of scissors to cut out the plant part labels. Then cut out the descriptions of the function of the different plant parts. Use some household glue or clear tape to attach the labels and descriptions in the correct box next to that plant part.

**Flower**

This is the reproductive part of the plant

**Leaf**

Photosynthesis occurs here

**Stem**

This supports the plant

**Fruit**

This carries the plant's seeds

**Root**

This structure absorbs water and nutrients from the soil
